

**David W. Abbott, P.G., C.Hg. (CA)** is a Consulting Geologist specializing in groundwater with over 46 years of experience in the exploration and development of groundwater supplies, installation and design of water supply wells, perennial yield studies, contamination investigations, geotechnical and groundwater problem solving, and protection of groundwater resources. Mr. Abbott has conducted and managed water supply and environmental projects throughout the western United States including CA, WA, NV, OR, ID, AZ, AK, MT, NM, CO, and NE. These projects not only provided experience in a wide array of geologic environments but also provided experience in a variety of groundwater situations, issues and problems supporting groundwater purveyors, geotechnical engineers, construction dewatering contractors, aquifer recharge and groundwater management districts, water rights attorneys and their clients, environmental pollution clients, and precious and aggregate mining industries. An AEG member since 1978, Mr. Abbott continues as the AEG San Francisco Bay Chapter Treasurer position since 2011.

Mr. Abbott is a member of National Groundwater Assoc. (1976), American Geological Institute (1976), Geological Society of America (1986), CA Groundwater Assoc. (1987), American Geophysical Union (1989), National Center for Science Education (NCSE, 2002), and Northern CA Geologic Society (NCGS). Special interests include basic groundwater and hydrogeology education, Quaternary geology, well design, well hydraulics, fractured rock hydraulics, low-yield aquifers, down-hole geophysics, applied geostatistics, and forensic geochemistry. David holds a B.S. degree in Geology from the University of Puget Sound, and 94-quarter units of graduate study toward an advanced degree in geophysics (paleomagnetism) from the University of Oregon and Western Washington University. Mr. Abbott is also a Professional Geologist in WA and NH. In addition to technical presentations and publications, he was a contributor to two books, one on MTBE in 2000 and the other on Chromium (VI) in 2005. David also assisted in the preparation of the third edition of Groundwater Hydrology (2005) by David K. Todd, Ph.D. and Larry Mays, Ph.D.
