

Sarah Benjaram – is a geologist at AECOM based in Oakland, CA where she works on design-phase geotechnical investigations for water infrastructure such as dams and tunnels. Sarah previously worked for the CA Department of Water Resources in Red Bluff. Her master's research at Montana State University (2014) into soil chemical weathering regimes helped develop tools for better understanding high-relief mountain settings. She holds a B.S. in Geology from UC Davis (2012).
