

Sarah Kalika, PG, CAC earned her Bachelor of Science degree in Geological Sciences from UC Santa Barbara and has approximately 21 years of experience as a geologist in the environmental consulting industry, working for the majority of her career in the San Francisco Bay Area. Her work has focused on environmental geoscience investigations including preparing Phase I & II property transactions, asbestos and lead surveys for renovations and demolitions, abatement oversight, geologic mapping and sampling for the presence of naturally occurring asbestos, asbestos dust mitigation plan preparation, area air monitoring for asbestos, construction storm water pollution prevention plan preparations and inspections, and health and safety plan preparation. Ms. Kalika is a frequent public speaker for consulting companies, school districts, commercial property managers, and members of the Association of Environmental & Engineering Geologists.

Ms. Kalika currently serves on AEG's Executive Council as Vice President, Secretary of the AEG / IAEG Naturally Occurring Asbestos Commission, and is the Website Editor / Publications Chair for the San Francisco Chapter. She is a past Chapter Chair and previous Northern California representative on AEG's Board of Directors.
